

BSE/TSE-Free & Non-GMO Declaration

This declaration applies to the following product supplied by Magnus InterGlobe and manufactured by Tianran Biotech (U) Ltd:

Product	Food-Grade Bovine Skin Gelatin	Grades covered	All Bloom grades & mesh sizes
Source species	Bovine (single species)	Raw material	Bovine hide / skin only
Country of origin	Uganda	Manufacturer	Tianran Biotech (U) Ltd, Jinja

A · BSE / TSE-FREE DECLARATION

WE HEREBY DECLARE THAT THE ABOVE GELATIN:

- Is manufactured **exclusively from hides and skins** of bovine animals — a raw material recognised as carrying negligible risk of transmitting BSE/TSE. **No bones and no Specified Risk Materials (SRM)** — brain, skull, eyes, tonsils, spinal cord, vertebral column, or intestines — are used.
- Is sourced from **healthy animals** fit for human consumption, slaughtered under official veterinary ante- and post-mortem inspection.
- Originates from **Uganda**, where cattle are reared on natural pasture (**grass-fed**) and are **not fed ruminant-derived meat-and-bone meal** — the principal transmission route for BSE. No case of BSE has been reported in the herd of origin.
- Is produced by an **alkaline (lime) process** which, together with the manufacturing conditions, is recognised to contribute to the inactivation / reduction of any potential TSE agent.
- Is **single-species bovine**; the product is not mixed with, or derived from, any other animal species.
- Conforms to the principles of **Regulation (EC) No 999/2001** (TSE), **European Pharmacopoeia 5.2.8**, and the **EMA Note for Guidance EMEA/410/01** on minimising the risk of transmitting animal TSE agents, and is consistent with US FDA requirements for bovine-derived materials (21 CFR 189.5).

B · NON-GMO DECLARATION

- The product is **not genetically modified** and does **not contain, consist of, or is not produced from Genetically Modified Organisms (GMOs)**.
- No genetically modified material is used at any stage of manufacture; the product therefore falls **outside the scope of GMO labelling** under Regulations (EC) No 1829/2003 and (EC) No 1830/2003.
- Gelatin is obtained by physical and chemical processing of animal collagen and contains **no DNA of the source animal** in a functional/amplifiable form.

C · SUPPORTING QUALITY & REGULATORY STATUS

Manufactured under **FSSC 22000 v6** (Bureau Veritas KE004238-1), **ISO 9001:2015** (KE003666) and **ISO 22716:2007** GMP (KE001/26) certified management systems. The manufacturing facility is **US FDA food-facility registered** (Reg. 10061730108). **Halal**-certified under KBHC No. 13862. A lot-specific Certificate of Analysis accompanies each shipment.

Document no.	MIG-DEC-BSE-NGMO-01	Revision	01 (first issue)
Issue date	2026-06-09	Valid	Until superseded

Disclaimer. This declaration is made in good faith on the basis of information provided by the manufacturer and is valid at the date of issue. It does not replace the lot-specific Certificate of Analysis, which governs. The user is responsible for determining suitability for their application and for compliance with applicable local regulations. To be reviewed and approved by an authorised person before issue to a customer.
